

Parent Accounts

How to use the Scholars Online website and your Parent Account to monitor your student's work.

Click on the page, use N or → to advance to the next slide. Use P or ← to return to a previous slide. Type a number to advance to that specific slide.

This guide has three parts:

- 1. [Slide 3] An overview of the information available from your parent account (Account Management Center).
- 2. [Slide 14] An overview of other resources at the Scholars Online website, including the Bookstore and SO Policies.
- 3. [Slide 23] A brief introduction to the Moodle resources available to parents.

This is by no means a complete guide to everything at the SO site. Other guides are available to help you actually create memberships, enroll students, and make payments, and for you and your students to use the Moodle:

- Enrollment Guide
- Payment Guide
- Student Moodle Guide

We encourage you to also check the FAQs page for questions other parents have asked, and to let us know if you can't find information you need to help you make decisions about enrolling at Scholars Onine.

REAL CLASSICAL EDUCATION FROM A VIRTUAL SCHOOL TEACHING CHILDREN AND ADULTS FOR OVER A QUARTER CENTURY

When you join Scholars Online, you create a parent or adult sponsor account, and student accounts. You can enroll your sponsored students and yourself in any course. Once you pay your membership fee for the year, you also gain access to the Moodle, where many teachers keep their materials for students, including assignments, quizzes, and grades, and where the administration supports orientation courses and some discussion courses. You log into each of these by clicking on the appropriate Login option from the SO Home Page.

To log into your parent account, enter the username and password you selected. These passwords are encrypted before entry into our database, so we cannot recover them for you. Our policies require that you keep this password secure from your students, so that any communications we send or receive from you are properly identified

NOTE: You can change your existing password if you know it, or ask for a temporary password from the Moodle Login page.

SCHOLARS ONLINE

You are not logged in

SCHOLARS ONLINE MEMBER LOGIN

Adult and Alumni members may log in here to retrieve account information, correct member profiles, create new memberships for dependents, and aproll themselves or their dependents in courses.

Students should use the Moodle Login link at the left to log in to the Moodle and manage their personal information and email addresses from there. Login is also required for students making recommendations in the Bookstore.

Password	

Need an account?

Please review the membership role and fill out a Membership Request form and pay your membership fees. Membership is required for access to the Moodle community and to enroll in all Scholars Online courses.

Need to Change your password?

If you are not logged in, you will need to log in before you can change your password

Forgotten your password? Email a password reset request to the Accounts Manager.

When you first log into your Parent account, you have the opportunity to tell us how you heard about us by completing the referral survey. This helps us plan our advertising budget. Once you complete the referal, this link turns into a thank you message.

You can enroll in courses for your self.

Note: Modifying your own information, entering student information, and enrolling students in courses is covered in <u>the Membership and</u> <u>Enrollment Guide</u>.

I. 4: Student Course List

Below the student's course list are options to enroll the student in courses currently available, update information about the student in his or her membership form, review the transcript information we have, and show the student's schedule for the current and upcoming year (if enrollment has opened for that year). At the bottom is a message stating whether the student is a member for the current enrollment year. The message shown here indicates that mycroft's membership dues have not yet been paid for the current academic year.

Not yet a member for enrollment year 2023

I. 5: Student Information Options

If you have an older student who has reached the age of 18, you may see a notice like this in your parent account. Privacy rulings by the Federal government require us to protect the information of students over 18 from everyone -- including the student's own parents -- unless we have written consent. This student will be able to login as an adult using the parent login to see his or her own academic records.

All payment information for this student will still show on your invoice records, however.

Member: Digory Kirk This student is an SO alumnus or alumna who is over 18 years old. Following FERPA rules regarding educational information privacy, he or she now has an adult account and must enroll in courses or access transcript information directly. As a courtesy, invoice information is still available in the Invoice Summary history below for fees paid while the student was a minor.

Clicking on the Show Transcript button displays the student's complete transcript for all courses taken at Scholars Online. Not all teachers post midyear grades, but if you need grades to meet your local state or school district homeschooling requirements, let the teacher know, and he or she will post the grades.

Final grades are posted by July 1 following the academic year.

You should review the transcript information periodically to make sure that it is complete and correct. Notify the reporting teacher if you have questions about the grade they have reported, and the administrator if you have issues with the reported grade.

If you need formal transcripts for jobs, driver's licenses, special interest camp, scholarship applications, public or private school transfers, or college applications, simple email us at <u>accounts@scholarsonline.org</u> with the addresses and deadlines when the transcripts are due. There are no fees for a "reasonable" number transcripts -- these are covered by your registration fee. We will try to mail transcripts within 48 hours of your request, but the US Post Office can take up to two weeks for delivery, so please let us know at least three weeks in advance of any due dates.

Class	Status	Midyear Grades		F		inal Grades	
		Letter Grade	Numerical Grade	Comment	Letter Grade	Numerical Grade	Comment
Algebra 1 AP Physics 1 and AP Physics 2 Combination	Enrolled Enrolled	0 0	-	No comment submitted No comment submitted	0 0	-	No comment submitted No comment submitted
Astronomy	Enrolled	С	69.00	mycroft struggled with basic terminology, and missed many quizzes.	В	82.00	mycroft studied much harder this term, did well on quizzes and wrote two superb essays for his final. He completed 14 of the assigned labs. Lab credit granted.
Croal II	E111	0		No comment automitted	0		No comment or hereitted

We can also send you an official transcript PDF with a signed cover letter if the institution will accept this form.

Clicking on the student's schedule button opens a new display similar to the Academic Schedule display. Courses your student enrolled in are shown in bold; other courses offered are shown dimmed out. Clicking the arrow next to the course will take you to the course description.

This display can help you determine quickly whether you have any course conflicts, or whether a course you are considering will fit into the student's current schedule.

Create New Student Account

Change Password for Christe McMenomy

Clicking on the Required Texts button in your account page takes you to a modified version of the bookstore page, filtered for the books required for your student's courses for the current enrollment year. You can list the books several different ways. In the Textbook Covers and Full descriptions lists, book covers and titles will take you to the Amazon store and allow you to buy new or used copies of the text. Checking the cover picture is a good idea since it can help you identify specific editions of the text if the teacher requires a particular edition. The notes may also indicate whether the text is available online or in the public domain.

Of course, you can also list books by course through the SO Bookstore.

I.10: Customized Text lists

2023 Courses and Textbooks for mycroft bot

Biology Instructor: Christe McMenomy RequiredBiology: Concepts and Connections Martha R. Taylor; Eric Simon; Jean L. Dickey; Kelly Hogan

Notes:

Please be sure that you are purchasing the 10th edition (Giraffe cover). You do not need to purchase Mastering Biology access to the publisher's site; all materials for the course will be available from Scholars Online's secure Moodle site. This text is available for rental in eText format through VitalSource (9780136538981).

You can also get to the Bookstore from the Resource tab on the SO menu bar. You can browse by sequence area, or use the Login button to get to your customized book list.

Buying books through the Scholars Online portal raises money for the scholarship fund, so we encourage you to make your textbook purchase through our bookstore. If you designate Scholars Online as your charity, you can donate to the SO Scholarship Fund with every Amazon purchase you make!

Part II: Other Scholars Online Website Resources

- Site Contents Map
- Support contacts
- Policies
- About Us Mission and Beliefs

The Scholars Online Website has a lot of information. Most of these are available directly from the dropdown menu,. Some parts, like the policy information, are essential for you to review.

Part II.1: The SO Site

The Scholars Online Blog contains articles by the teachers and administrators, discussing their approach to education and character formation. While we don't publish a lot, these entries are definitely a way for for prospective and continuing parents to discover how we approach teaching your children. You can also respond to the articles even ones from several years ago, and let us know what you think about the topic. We'd love to hear from you!

Supporting Us

Mrs. Lucie Seitz

Academic Support

Lucie Seitz is a veteran of Scholars Online courses and a former teacher at Scholars Online, and she is very familiar with our teaching philosophy, curriculum, and methods. She has also taught Latin in the classroom. She will work with you to determine which of our courses best suit your student's learning style, abilities, and background, or whether you may need to look elsewhere for appropriate instruction. Use the number above to arrange a time to for her to return your call or email her with your questions.

Part II.3: Getting Support

THE SCHOLARS ONLINE MOODLE ENVIRONMENT

Scholars Online uses an open source course management system called a Moodle (Modular Object-Oriented Distance Learning Environment). This teacher-designed package provides an integrated secure environment with most of the functions that we need for a distance-learning community. It includes course organization areas where teachers can list chats links, post and collect assignments, set up quizzes, record grades, link in outside resources, mail notices to course participants, foster communication between students with individual class or even class session forums, or add wikis and glossaries.

Students have individualized home pages in the Moodle, listing their own courses and links to their teachers. The calendar on this page contains all scheduled events for the student's classes, including quizzes and assignment due dates.

Scholars Online Home Page

The Moodle, Live Chats, and Chat Logs links under the **Online Education** tab show you what the Moodle is, and gives our reasons for using a non-audio chat for most of our core courses. There are example chats you can share with your friends if you want to show them what the chat experience is like. These are actual chat sessions, but the names of the students have been changed.

There's a lot more information on the Moodle in the Student Moodle Guide!

We ask you to respect the privacy of your fellow students and make copies of the chat files only for personal review.

Part II.4: Moodle, Live Chat, Logs

The Policy Page includes links to our school policies. Most of these have been drawn up based on those of other respected organizations. They rarely change, but if they do, we will notify you and publish information in the Blog and News links explaining the changes.

• Terms of Use

Here we require that you respect all Scholars Online members, recognizing their ownership of any materials they publish, treating them civil, and protecting their privacy. Some of these are simply good manners, others are our legal responsibility as a non-profit organization.

• Privacy

This policy explains Scholars Online's legal responsibilities to protect your information. We maintain an industry standard SSL connection for all pages that contain student data. Some student information is also covered by COPPA, and educational records are covered by FERPA rules.

• Cheating and Plagiarism

Our cheating and plagiarism policy was drafted after reviewing the policies of a number of private schools, colleges, and universities, and discusses some of the difficulties of appropriate use of easily available information when composing homework and taking exams. We'd tried to be as explicit as possible about what constitutes plagiarism (publishing work others have done without proper citation, or claiming it as your own) and cheating (violating the conditions under which an exam is to be administered, lying about any aspect of ones own work, using tools the teacher has restricted for a particular assignment or examination). Scholars Online has unfortunately had to expel students who, after warnings and counseling on what constitutes cheating, continued to turn in work others had done as their own.

• The Moodle Policy

This outlines the use of the Moodle, and is basically the same policy of respect required for using the rest of the website.

Email Policy

We require that parents and students have separate emails, and that parent mailboxes be password protected so that students cannot intercept mail sent to their parents. (Yes, this has unfortunately happened). If for any reason you need to change your email address, please update the email entry in your member record.

Phone Policy

We will never call you by telephone unless you have requested the call and arranged for the time.

If you receive an unsolicited call that claims to be from Scholars Online, feel free to hang up, or to request a callback number. Then report the callback number to us and we'll file a fraud report.

Scholars Online Members use this page to log into chat sessions, including The Commons and Orientation (once the member has registered for that course).

Use the link on this page to change your default password. If you forget your password, use the password reset request to have Scholars Online issue you a new temporary password.

Scholars Online Members use this page to log into the Moodle.

From here, you can also get to the Scholars Online Home Page and Chat Login page.

The *Grades Overview* report shows the current grade for all of the student's courses.

Depending on how the teacher is tracking course assignments, this may show the percentage of the work that has been completed OR it may show the student's total score only for work completed to date.

Part III.7 Grades Overview

SCHOLARS ONLIN

mycroft bot 🔎 Message 🛛 🖪 Add to contacts Grades Contribution Calculated to course Grade item weight Percentage Feedback Grade Range total ✓ 2023 Chemistry ✓ Chem Chat Prep Fall FORUM Wednesday Chat Preparation for 50.00 % 10.00 0 - 10100.00 % 12.50 % Chapter 1 rating FORUM Monday Chat Preparation for 50.00 % 100.00~%12.50 % 10.00 0 - 10Review Unit 1-2. rating FORUM Wednesday Chat 0.00%Preparation for 0.00 % 0 - 10(Empty) Review Unit 3-6 rating FORUM Monday Chat 0.00 % ۲ 0 - 100.00 % Preparation for (Empty) Chapter 2: 1-2 rating

Selecting *Grades* lists all assignments for the course (as shown in the student's Grades block.) The grade range and percentage will help you determine whether your student's score number score is good, since assignments may vary in total points awarded.

If you have questions about scores, talk to your student's teacher. Be especially cautious about assuming the automatically generated summaries are accurate indicators of overall performance. In many courses, Moodle grades form only part of the total evaluation of a student's work. In particular, most teachers give feedback directly in chat for specific assignments, and chat participation may be a critical component of the overall assessment. The Moodle captures only scores and feedback for work completed through its assignment, lesson, quiz, and forum features, not any work done in chat.
